between USC2 - USC14 dearer to easier by USC3 to USC8. Plainer descriptions ranged between firm to USC17 above last week's levels to easier by USC4 to USC13 with some teas neglected.

#### **DUST Grades**

Offerings: 64,340 packages (4.7m/kgs). 14.27% remained without bids

The Best **PDUSTs** in the market were irregular ranging between firm to USC2 dearer to easier by up to USC5 with Brighter sorts well-competed for advancing by up to USC34 following quality but a few invoices shed up to USC8 while Medium types were irregular varying between USC6 - USC14 dearer with quality to easier by USC4 - USC5. Lower Medium categories ranged between firm to USC18 above previous week's rates to easier by USC4 - USC20 and a few lines were unsold. Plainer descriptions met irregular interest ranging between steady to USC17 dearer to easier by USC2 - USC8 with some teas remaining unsold.

Best **DUST1s** on offer were irregular ranging between firm to USC8 above last prices following quality to easier by up to USC3 while Brighter varieties varied between steady to USC12 dearer with quality to easier by up to USC8. Improved Medium types saw better absorption and held firm to USC29 above last prices while others eased by USC6 - USC14. Lower Medium sorts saw an irregular enquiry varying between USC2 - USC14 dearer to easier by USC5 to USC16 and some invoices remained unsold. There was irregular interest on plainer descriptions ranging between steady

to USC18 above last week's levels to easier by up to USC40 and some teas remained without bids.

#### Secondary Grades

Offerings: 26,219 packages (1.32m/kgs). 11.59% remained unsold.

In the Secondary Catalogues, BPs were firm while PFs held value. Clean well sorted coloury Fannings appreciated while DUSTs were steady. Other Fannings were firm with similar DUSTs steady. BMFs were well absorbed.

#### **Markets**

There was strong enquiry from Egyptian Packers with useful but selective interest from Kazakhstan and other CIS states while Sudan, Yemen, other Middle Eastern countries and UK showed useful support. Pakistan Packers and Bazaar Ient useful interest but at lower levels while Russia showed good activity with more but selective enquiry from Afghanistan. Iran were quieter with good support from Local Packers on account of price. Somalia were active at the lower end of the market.

#### **Other Tea Auction Centres**

Jakarta: at Sale 21 held on the 25th May, 2021. This week auction was held a day ahead, following Buddhist holiday Vaisak Day tomorrow. The offerings of 6,980 psacks included 1,640 psacks CTC teas. There was good general, widespread demand at firm levels. As usual, only 2 to 3 lots were sold at the eauction, leaving buyers to negotiate final prices after auction. The pattern of buying this week was mostly unchanged.

olombo: at Sale 20 held on 24th and 25th May, 2021, The 1.2Mkg of Ex Estate teas on offer met with low er demand. Select best Western High Grown BOPs were easier, the below best and plainer varieties too eased Rs.20/- to Rs.30/- on average. Select best BOPFs were irregularly easier, the below best and plainer varieties were lower by Rs.10/- to Rs.20/- on average. Nuw ara Eliva BOPs sold well following quality, the BOPFs were irregularly easier. Udapussellaw a BOPs were lower by Rs.10/- to Rs.20/-, the BOPFs too eased by a similar margin. Uva BOPs were firm to a little easier, the BOPFs were mostly lower. Low Grown CTC BP1s declined, the High and Medium sorts were easier by Rs.20/- to Rs.30/-. Low Grown PF1s too declined from last week's levels. The High and Medium sorts were barely steady. The 3.3Mkg of Low Grown teas which were on offer met with lower demand. Select best and best OP1s were firm. Well-made BOP1s attracted better interest, others met with fair demand. Select best OPAs were firm, others were lower. OPs declined following quality. Bold Pekoes were irregularly lower to last. Well-made Pekoe1s were firm, others declined several rupees. In the Small Leaf segment, select best BOP.SP / BOPF.SP and BOPFs met with lower demand. Select best and best BOPs shed few rupees. FBOPs declined few rupees following quality. Select best and best FBOPF1s met with lower demand. FBOPFs were firm. All Premium Flowery teas met with fair demand. Iran, Russia and the C.I.S. countries lent fair support, whilst Turkey was selective. Libya and Iraq lent fair support.

hittagong: at Sale 03 held on 24th May, 2021. CTC LEAF: 20,034 packages of Current Season & 810 packages of Old Season teas on offer met with a selective demand with higher withdrawals. BRO-KENS: A handful of well-made clean liquoring Brokens sold well often easing by Tk. 5/and more whilst Mediums met with much less demand and prices declined by Tk.7/to Tk.8/- with heavy withdrawals. Similarly Plain teas also met with only limited interest and there were heavy withdrawals. BLFs saw less interest at lower rates. There were again more withdrawals in this category. FANNINGS: A few well made coloury Fannings were well supported at about last levels but Mediums saw selective demand and where sold eased by Tk. 5/- to Tk.7/but there were heavy withdrawals. Plain teas saw only limited interest and only a few lines sold at reduced levels. BLFs saw less interest at lower rates. There were again more withdrawals in this category. CTC DUST: 6.075 packages of Current Season & 60 packages of Old Season teas on offer met with quite a strong demand. Best and good liquoring Dusts met with a good competition and sold at firm to dearer rates. Other varieties were a steady market. BLF Dusts were readily absorbed at slightly dearer rates with less withdrawals. Blenders lent strong support with fair interest from the Loose tea buyers. COMM ENTS: Demand was more selective this week with mostly Blenders operating for coloury teas and neglected lesser varieties. Loosé tea buyers were much less active and lent limited support to the best on offer. As a result, withdraw als in the Leaf catalogue was heavier. Dusts witnessed better demand than Leaf and most teas were sold.

ochin: at Sale 20 held on 19th May, ≥ 2021. CTC Leaf: Good demand. Brokens and Fannings selling at fully firm levels. Buying pattern: Good demand from Internal and Upcountry buyers. Export buyers were active. ORTHODOX Leaf: Good demand. Well made high grown whole leaf, brokens sold at barely steady levels. Medium whole leaf and bolder brokens also sold at irregular to easier levels whilst smaller brokens tended steady. Buying pattern: CIS/Middle East exporters were active. Upcountry buyers lent support on whole leaf grades. Dust Fair demand. Popular varieties and good liquoring finer grades sold dearer 4-5c and sometimes more. Plainer sorts witnessed better enquiry and selling dearer 4-6c and more. **Buying pattern**: Major blender AVT was active. KSCSC was inactive. Best mediums fetched with fair support from regional packeters. Domestic buyers were less active in their purchases. Exporters were selective.

### alcutta: Sale 21 postponed

Guwahati: at Sale 21 neid on Zoui May, 2021 with 53,184 packages of tea on offer. Market: CTC There was good demand www.ahati: at Sale 21 held on 26th May, for good and better medium Assams at firm to dearer rates. Demand was fair for the medium Assams, Cachars and BLF around last levels. Buying Pattern: HUL/TCPL lent good support. Western India buyers were very active on good and better medium Assams. Buyers for other upcountry destinations operated normally. There was very little export enquiry. Market: DUST The sale witnessed good demand for good Assams dusts at firm to dearer rates. Demand was fair for the remainder Assams, Cachars and BLF at around last levels. Significant withdrawals were seen in this category. Buying Pattern: HUL/TCPL and Western India buyers lent fair support. There was very little export enquiry.

#### Covid surge spooks tea gardens

Workers live in cramped living quarters where measures to curb the virus's spread are difficult to implement.

When Indian tea plantation worker Bholanath Natto and his wife tested positive for Covid-19 their biggest worry was not their health, but where they would quarantine and how they could get hold of food and drinking water without his wages.

As some of the cities worst hit by India's Covid-19 crisis see a lull in new cases, infections are rising among millions of tea pickers — many of whom live in cramped living quarters where measures to curb the virus's spread are difficult to implement.

The positive test result and hospital orders to quarantine have been a logistical night-mare for the Nattos, who have spent the last 15 days holed up in a wood shed behind the two-room plantation house they share with their children.

"We converted a shed where we stored wood in case our cooking gas ran out into a makeshift room for my wife and me to live in isolation," Natto, 55, said from his home in Bengal. "My teenage daughter stepped into the kitchen for the first time to cook, while her older brother tried to arrange drinking water for us. Nobody wanted to help us because everyone is scared. We are home alone, with food running out." India reported its lowest daily rise in new infections since April 11 on Monday, but concerns have been voiced about rising numbers in the country's east and northeastern regions, home to lush tea gardens that supply much of the world's tea. Since the pandemic began, India has reported 28 million cases and 329,100 deaths, health ministry data showed, though the true figures are widely believed to be much higher. India's tea estates employ some 3.5 million workers, thousands of whom are currently quarantining in small, overcrowded homes, struggling to access food, water and aid, union leaders said

n Bengal, more than 4,500 cases have been recorded across 300 of the state's 800 tea gardens, according to government data.

Cases in the tea gardens of neighboring Assam have risen three-fold in the last 10 days, with more than 6,000 workers and family members testing positive, local media reported. "The situation is alaming said Abhijit Mazumdar, working president of the Tarai Sangrami Cha Shramik Union, which represents tea pickers in Bengal. "There are no facilities — no isolation centers, no doctors in defunct dispensaries — leaving workers to battle the disease alone. Fever cases are up, those testing positive are stuck at home with their families and simply resigned to fate," he added.

Islands of neglect

India is the world's second-largest tea producer and the industry has long faced accusations of exploitative labor conditions.

"The gardens are like isolated islands, each supposed to have all facilities for its workers who live on site. But in reality they are islands of neglect," Mazumdar said. Tea industry group the Indian Tea Association said it was pushing for plantations to ensure on-site vaccination for all workers and their families. "We are not just concerned but fully involved with the district authorities to keep tea garden workers safe," said Arijit Raha, the association's secretary general. "There are customised guidelines for tea gardens and we are ensuring our members follow them. Fever checks, masks, sanitization and Covid care centers are a must. We have managed to keep the infected numbers low, but the challenge remains.

Recipe for disaster

But deep in the heart of the gardens. where ongoing tea picking season means non-stop work, workers said they had no access to separate quarantine facilities and were constantly worried they would spread the infection to their families. There are up to three generations living in these two-room, often dilapidated homes, with one bathroom to share," said Victor Basu, founder of Dooars Jagron, a charity working to defend tea workers' rights. "It's a recipe for disaster. Tea garden hospitals need to be made functional and if safe spaces for isolation are not created the pandemic will spread like wild fire." he added.

In Banarhat in Bengal's Jalpaiguri district,

Gangaram Teli, who works as a security guard, has been watching with trepidation as coronavirus cases in his tea garden rise. 'There is one tap for four houses," said Teli, 39. "For affected families, accessing the water point or buying groceries is very stressful. The disease is such that neighbors hesitate to help." While Natto's fever has passed, the last few days of the couple's three-week confinement have been particularly fraught because their savings have dried up. "I feel fine but cannot step out for another few days," said Natto, who eams about Rs 7,000 per month and only gets four days of paid sick leave. "We need food in the house.... I have to go back to work."

# Tea sommelier finds niche in luxury flavors

While living in the UK and the US for about 14 years, tea sommelier Tehmeena Manji, realised that it was difficult to find African loose leaf teas in some of the finest tea rooms and supermarkets in the two countries. "This seemed like a bit of a disconnect with my knowledge of the existence of beautiful tea gardens all over Africa," she told BDLife.. Eager to showcase the bounty of African heritage through the lens of beautifully hand-crafted tea blends, she launched the Muthaiga Tea Company in August 2020. She makes flavours such as Rwanda Noir and Swahili Oolong. Swahili Oolong is a hand-rolled tea that has a natural malt taste. "We add spices to the delicate malt taste. I first taste the tea to ensure the consistency of quality and then I taste each of the spices in hot water to ensure their consistency as well," she

#### News Articles of Interest continued ...

says. "We then cut the spices into sizes and blend them with the tea and then cup/taste the blended tea and grade it to ensure consistency of quality." She did not want to replicate the tried and tested tea blends such as mint tea, masala chai and the like. "We want to create unique teas using natural ingredients that you are not likely to find anywhere else," Ms Manji says. The UK Tea Academy-trained sommelier sources the teas from smallholder farmers in Kenya, Tanzania and Rwanda, with a pipeline of ingredients from other African countries - herbs, dried fruits and flowers - creating a unified blend specific to the artisanal teas. One such blend is the Resurrection d'Amour (The Resurrection of Love), where they used the Resurrection Leaf from Zimbabwe, popular among herbalists for its healing properties. "This was one of the first known instances of the Resurrection Leaf to be used with a green tea from Kenya," she says. Just like wine, good quality, loose leaf tea has different notes depending on the terroir and location where the leaf is grown. High altitudes and slightly acidic soil give the leaf a specific flavour profile, perfect for diverse food pairings. Training as a tea sommelier enables one to pick up notes in the tea leaf as well as other complementary ingredients. Once the aromatic notes have been identified, she then determines how these notes can mingle with different flavour profiles in food. "For example, if you are having sushi or sashimi, you want to retain the flavour of fish in your mouth and slightly cool down the bolder flavour of the soya sauce and wasabi, so I would pair that with our white tea blend-Moonlight Needle," she says. The savannah grass and apricot notes of the tea enhance the flavour of the fish, the slightly sweet peach notes mellowing the wasabi and soya flavour down a notch. "You will be left with a lingering bouquet of balanced notes in your mouth," she says. For Ms Manji, her perfection comes from experimenting with the teas. As the current "chief everything officer" of Muthaiga Tea Company, she employs her vast background in Japanese and British teamaking techniques. "For instance, I wanted to see how our Purple Haze tea (Kenyan purple tea blend) would taste while cold, so I brewed and kept it overnight and added a dash of lemon and honey the next day and since it was a beautiful, sunny day, I decided to add a little gin to it and it tasted amazing," she says. After refining the recipe with mixologists at restaurants where she supplies the tea, it grew to be a fan favourite. "Now we have a new Purple Haze G & Tea which gives you a boost of antioxidants while you are enjoying your gin. Field evidence indicates that it reduces the guilt from drinking gin too," she says.

#### Price range

Nearly a year after its inception, the company has already found a niche in the tea market. "We did a six-month pilot study to understand how the market would receive innovative, artisanal teas blends and to our delight, we found that there is a healthy market for premium teas from people that have refined taste and are willing to spend for their health and wellbe-

ing," Ms Manji notes. The teas range from Sh585 to Sh1,500 and are currently being sold at select stores in Nairobi and online

With favourable response from both expatriates and locals after their pilot phase, they upgraded their packaging to a definitive "tea caddies" inspired by the Japanese love for all things tea. Though they have yet to begin exporting, a following abroad has already been established. "People are regularly requesting us to create gift hampers with our tea boxes and some have sent our gifts to their families and friends abroad," she says.

#### Quick facts

-According to Chinese legend, Emperor Shennong was the first to travel this journey, recognizing loose leaf tea for its unique taste and healing properties. While sheltering in the shade of a tea tree circa 2737 BC, a breeze blew a few dry leaves into a pot of water he was boiling to drink. The rich flavour of the water pleased him, he christened it "cha", and so the worldwide travels of quality loose leaf tea began. - Kenyan soil first hosted tea trees in 1903, planted by the Caine brothers in present-day Limuru town, and has since produced some of the most prestigious and renowned varieties of black tea in the world.

#### **Regional Weather Conditions and World Crop**

enya: Murang'a: was mostly sunny with light showers at night. 24.5mm of rainfall was recorded over 4 wet days. The highest and lowest temperatures were 28°c & 10°c respectively. Crop intake averaged 95 tonnes/day on a six day plucking cycle.

Nyeri: the week was a bit cold. 16.4mm of rainfall was recorded over 2 wet days. The highest and lowest temperatures were 22°c & 11°c respectively. Crop intake averaged 55 tonnes/day on a six day plucking cycle.

**Meru:** was mostly warm and sunny with no rainfall activity recorded throughout the week. The highest and lowest temperatures were 27°c & 14°c respectively. Crop intake averaged 53 tonnes/day on a six day plucking cycle.

**Sotik:** there was a change in weather pattern; cool & dry conditions with reduced rainfall. 8.8mm of rainfall spread in three days was received. The highest and lowest temperatures were 26°c & 13°c respectively. Factory utilization remained as last week's levels.

**Kericho:** Sunny conditions throughout the week with only two rainy days. An average of 16.1mm rainfall was recorded. Average temperatures were highs of 24° Celsius and lows of 10° Celsius. Crop volumes went up by 6% compared to previous week's levels. Crop is on an upward trend with current good growing conditions.

ganda: there was reduced rainfall activity in all tea growing areas with the exception of Hoima that recorded improved rainfall activity. Fort Portal received 13mm (48mm), Hoima 40mm (18mm), Bushenyi 5mm (4mm) and Kibale 12mm (17mm). Average tempera-

The trouble with weather forecasting is that it is right too often for us to ignore it and wrong too often for us to rely on it.

tures were highs of 30° Celsius and lows of 15° Celsius. Crop intake increased.

## Performance of the March-April-May 2021 Rainfall Season

The March to May 2021 seasonal rainfall has ceased over several parts of the country except over the Lake Victoria Basin, the Highlands West of the Rift Valley, the Central and South Rift Valley and the Coastal strip as had been predicted. The distribution, both in time and space, has been generally poor over most parts of the country. The month of March saw depressed rainfall over the whole country. In April and May 2021, several parts of the country received near to below average rainfall. An assessment of the rainfall recorded from 1st March to 25th May 2021 indicates that the rainfall performance was near average to below average over most parts of the country. Only three stations (Eldoret, Lodwar and Meru) recorded rainfall that was above their MAM LTM. The most enhanced rainfall of 143.5% was recorded at Eldoret station. This was followed by Lodwar at 131.7% and Meru at 131.3%. Lamu Meteorological Station in the coastal strip recorded the lowest amount of 36.8mm (7.6% of MAM LTM). As of 25th May, Kisii Meteorological Station recorded the highest seasonal rainfall total of 641.2mm

## The Outlook for June-July-August 2021 Rainfall Season.

The outlook for the June-July-August (JJA) 2021 rainfall season indicates that the Highlands West of the Rift Valley, Lake Victoria Basin Region, Central and Southern Rift Valley as well as the Northwestem region are likely to receive slightly above-average rainfall. The Coastal strip is likely to receive below-average rainfall. The rest of the country is expected to remain generally dry.

Most areas in the Central Highlands and Nairobi area are expected to experience cool/cold and cloudy conditions with occasional rain or drizzle. The temperatures are likely to be slightly warmer than average for the season.

crop production Kenya: Crop production maintained previous week's level. With the early onset of the cold spell in the EoR crop production is expected to decline whilst WoR will continue to receive useful precipitation and with it fairly good volumes. Uganda: Crop volumes increased. In the backdrop of good rainfall activity in the recent past, crop volumes will remain health. Malawi: Crop intakes remain good.
